

White

World's first waterfall-typed air purifier

Water flowing down on wide surface like waterfall effectively eliminates formaldehyde which is a main cause of Sick House Syndrome.

Proven to be safe - UV sterilizer

No worries for virus and bacteria in water(99.9% elimination). An effective and affordable way to combat indoor air pollution makes your life fresh and clean.

New concept of hybrid humidification

IGUASSU Waterfall uses the unique hybrid humidification method in which fresh air blows over the heated water, so that it increases natural evaporation to maintain the ideal humidified level.

■ Six stage filters for clean and fresh air

- **Prefilter** : removal of visible large dust
- **Antibiotic filter** : removal of dust mites and germs
- **HEPA filter** : removal of fine dust and bacteria
- **UV sterilizer** : destroying virus in water
- **Deodorization filter** : elimination of an odor and ETS ammonia and various gases
- **Waterfall-shaped filter** : control of indoor humidity and factors of Sick House Syndrome

Touch sensor button : user-friendly and classy appearance

Automatic air speed operation : controlling the fan speed automatically on contaminant level

Timer : setting the operating time while asleep and out

Product Name IGUASSU Waterfall Air purifier

- | | | |
|--------------------------------------|---|--|
| ■ Model : CHA-500VH | ■ Power rating : AC 220 or 110V/60 or 50 Hz | ■ Power consumption : 40 W (heater: 965 W) |
| ■ Air flow : 4.6 m ³ /min | ■ Area of coverage : 29 m ² | ■ Dust collection efficiency : 90.2 % (Fine dust 0.3 μm ²) |
| ■ Net weight : 11 kg | ■ Deodorization efficiency : 76 % | ■ Dimension : 486Wx386Dx737H (mm) ■ Noise : 45 dB |
